

COVIDIST TERRORISM !

Harassment. Since 2020, in most countries, the state apparatus (press, government, scientific authorities, etc.) has harassed the population with anxiety-provoking daily messages and coercive measures, so that in exchange for the end of this harassment the citizens "accept" the experimental vaccination and the health pass (ie the systematic tracking of our social activities ...).

Homicides. The dangerousness of covid-19 is of the same order of magnitude as for severe influenza. The majority of all-cause excess mortality in 2020 was caused not by the virus but by the perverse effects of the fear strategy, including the disorganization of the medical system. The supply of medical services was thus sharply degraded, in quantitative terms (non-optimal allocation of resources) and in qualitative terms (stress on nursing staff). In addition, to "justify" the focus on the vaccine route alone, the state apparatuses **(i)** hindered the use of the usual treatments for respiratory infections, and **(ii)** instantly divided by twenty the usual duration before marketing authorization for new vaccines (from an average of fifteen years to a few months).

Intimidation. A pseudo "scientific consensus" has been fabricated by the repression of doctors and scientists denouncing these facts (media defamation, professional pressure ...).
